About This Game

They lived normal lives in a small city in the heart of a prosperous country. They never knew that occasional clashes between separatists and the government might dissolve into armed conflict until it all went heels over head. Now they're caught in the middle of war zone as a deadly conflict turns the country into a wasteland. They aren't soldiers, and they aren't warriors. But they are going to survive.

Your mission: lead a group of civilians out of the war-torn country.

This won't be easy. You'll be able to avoid the battlegrounds but not other survivors, squads, gangs and hordes - and you'll never know what their intentions are. Your choices will include hiding or attacking, and negotiating or engaging in trade, but you'll always want to think twice since the lives of the entire group will be at stake.

CHOOSE

You can take only five people with you, so choose carefully. Some are good at providing first aid, others are excellent negotiators and still others have a way with technology.

DECIDE

You'll make your way through the open map. You decide where to go next.

SURVIVE

Plan your way and carefully select your actions when coming across other teams. Improve the skills that will apply to your survival strategy.

ENJOY A SURVIVAL NARRATIVE

Your team is represented by tokens on the map. You interact with the game through dialog and observe card-style battles. Your tasks: plan, guide and operate.

Elium has a good gameplay that makes the combat fun and complex it is really good at entertaining. It also provides a fun tutorial simple but well done.. "I never play as the eastern nationalities..." Shrugs and clicks the green purchase button.

"My life is complete" :O. It's awesome!. In the games current condition. It is not worth the current price. There is hardly any content in this game for the price of 15\$. 3 games modes as of now, and they are terribly balanced and haven't been worked, it's clear they just released it without any balance in thought.

For example, the first mode (which is the same free one in Nemesis Realms) is fun, but once you have then 2 players againsts the VR player, it is IMPOSSIBLE to win as the VR user, especially if they rush you.Reasons why is because the Monster boss doesn't seem to get a HP increase, despite the number of players. The 2nd mode with the 2 dragon heads is pretty boring, it has a fun concept, reminds me of Castlevania bosses, but it doesn't take more then a few minutes to grow stale. The 3rd one, which is Frost Lich (I think), is probably the worst one, it is almost impossible to tell what is happening in the game, it's chaotic and not in a good way, especially for the 4 players vs VR player. Sadly, again, it's terribly balanced.

I love the concept of the game, but sadly with the seriously small, and low quality of the games current state. It is DEFINITELY NOT WORTH IT. I'll change this review if it ever changes but for now it is this for now. I hope for updates soon but this games creators seem to have abandoned it already, so I don't expect any changes, any time soon.

I would reccomend just downloading the free version of this game. Nemesis Perspective and stick with it then this.. *Loads game up*

One of the BEST games I've ever had the pleasure to play.. Nice action and graphics. I enjoyed the game play and the selection of weapons. Thumbs up!. fast, easy and hard at the same time. don't not buy this game. It's fun but needs some work still (March 2017).. i love the interior of this loco. The sounds are most likely accurate to the actual engine, however i was hoping for something different. my ONLY COMPLAINT on this particular model is this : the headlights and ditch lights do NOT show that they're actually illuminated, however when you are in the dark, it does illuminate the path in front of the loco. but on the model itself, they are dark. not sure whats the problem there, any suggestions from anyone would be appreciated.. high requirements 1chromosome/10. Exploring a world, talking to people, interacting with objects, and acquiring weapons\magic is exactly what I want to be doing in VR. Although this game doesn't do it particularly well, at least it's doing it and that gives me some hope for the future. Check out this quick 25 minute demo and recommend it if you like it: that'll let developers know what we want, and hopefully put some polish on the barebones ideas like this to make real games.
