The underlying fact is there is no equivalent in CAD of the Unity plugin for Python (which is what I have used to create my GUI modules), this is why I am forced to use the C++ plugin. Autocad lint problems I am currently working on a new project in Autocad and have come across a problem that seems to have started on a recent update. The lint error below keeps popping up after every type of changes made to a drawing.

The module that the error is pointing to is not changed. The other solutions I found were to delete the model, or open it and recreate the drawing. I think this needs to be resolved. If you have a fix please let me know. I have seen reference to a similar issue on the Autocad forums but I was not able to find the specific post. Archived from groups: Am I dumb... Autocad 64 bit mode I have Autocad 2010 (32 bit) installed on a 64 bit machine. I did a lot of cleanup on this machine and after doing some re-installs I am finally ready to switch to the 64 bit version. I have even converted the dlls and registry settings over. I have the 64 bit version of Autocad 2010 and I have installed the 32 bit version of Autocad 2012 on the same computer. The problem is that when I open the 32 bit version of Autocad 2010, it has the settings that I had on the 64 bit version. Is this a common issue? Or am I dumb? Thanks for any suggestions. I am using Autocad 2010 on a 64 bit machine. I did a lot of cleanup on this machine and after doing some re-installs I am finally 82157476af
