Well... for 5 20ac it is an OKish game. I did like it at first, but the more I played the less I enjoyed it. Why?

- it is unfinished. e.g. unit_404desc instead of a description for the unit_404 (missing name). It is easy to fix in the English.txt file, but has not been done and should have been done by the devs.
- bugs: the game randomly just freezes and only Alt+F4 is working.
- unlimited fights. Sometimes, the fight cannot be resolved and there is no "All units retreat exhausted" as in the original MoM
- the graphics are nice, but the Ux is awful.
